1. The following is an examiner's statement of reasons for allowance: In reference to the previous rejection based on Long, it is noted that Long does not show or teach the claimed limitation of the socklining "having a peripheral edge on top of and in direct contact with said outsole", Long specifically requires the peripheral edges of the socklining to be wrapped by the upper and therefore the edge is not in direct contact with the outsole and therefore there is no motivation to modify Long to have the socklining edges contact the outsole as claimed.

In reference to the previous rejection based on the combination of Weiss and Long, Weiss specifically requires an outsole with an edge which has a shape including a storm welt (13, as discussed in column 4 line 48-61) and the notch and peripheral edge shape taught by Long does not have a welt and the addition or incorporation of a welt in the edge shape of Long is not known or seen as a well known or obvious modification to the shoe of Long and therefore there is no motivation to combine the edge shape of the outsole of Long with the shoe of Weiss and therefore the claims overcome such a rejection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
